Dear Joe Laydon,

I want to take a moment to say Thank You for your quick response to my inquiry on the proposed sanitary sewer extension for Village at Institute Road.

You took the time to address my concern and put me and my family at ease by explaining the various options for the proposed sanitary sewer extension. I want you to know we trust your professionalism as well as the planning boards in making the best decision for the Town of Grafton and it's residents. I have no objection to the proposed forced main pumping station being across the road from my home , I just ask that we entertain the option of using corrosion resistant manholes with leak proof joints.

I was impressed the night of 2/27/17 at the public hearing on how you and your board work collaboratively to accomplish the many details associated with planning and building. I Look forward to a successful project and again thank you for your listening ear.

**RECEIVED**

Joseph Shaughnessy
